Table of Contents: Volume 8 (1995)

Number 1

A Model for Scheduling of Object-Based, Distributed Real-Time Systems
Jack P. C. Verhoosel, Lonnie R. Welch, Erik Luit, Dieter K. Hammer, and Alexander D. Stoyenko 5

Hard Real-Time Communication in Multiple-Access Networks
Nicholas Malcolm and Wei Zhao 35

Real-Time Fault Tolerant Operation of the 802.5 Token Ring *P. Pleinevaux* 79

Call for Papers: Special Issue on Real-Time Systems in Mechatronic Applications . 93

Call for Papers: Special Issue on the Challenges of Global Time in Large Scale Distributed Real-Time Systems 95

Call for Papers: Special Issue on Engineering of Complex Real-Time Computer Control Systems 96

Contributing Authors 97

Number 2/3

Guest Editor Introduction *Phillip Laplante* 113

Tools for Specifying Real-Time Systems
Giacomo Bucci, Maurizio Campanai, Paolo Nesi 117

Fixed Priority Pre-emptive Scheduling: An Historical Perspective
Neil C. Audsley, Alan Burns, Robert I. Davis, Ken W. Tindell, and Andy J. Wellings 173

An Historical Survey of Early Real-Time Computing Developments in the U.S.
Phillip A. Laplante, Eileen P. Rose, and Maria Gracia-Watson 199

A History of Real-Time Industrial Process Control in the Dutch Steel-Making Industry *Jan van den Ende* 215

Report of the First European Dependable Computing Conference EDCC-1
Klaus Echtle 227

Contributing Authors 229
